- [H3] Did you know that the tooth is the hardest part of the human body despite its relatively small size. The tooth is primarily composed of a mineralized tissue called enamel But why is it so strong? Enamel is primarily made up of hydroxyapatite crystals, which are rich in calcium which contributes to enamel's hardness.
- [H3] Did you know that saliva is nature's ultimate protector against tooth decay? Saliva contains essential minerals like calcium and phosphate, which help remineralize and strengthen tooth enamel. So next time you're tempted to skip a glass of water, remember that your saliva is your smile's unsung hero!
- [H3] Your smile says more about you than you might think! But did you know that your teeth play a starring role in this narrative? The alignment, color, and condition of your teeth can convey messages of health and confidence. That's why investing in your smile isn't just aesthetics but unlocking the power of self-expression.
