- [H3] Taking the perfect impression is one of the most important tasks in a dental office. Most patients are familiar with the conventional way of getting an impression taken which is not always comfortable or the most accurate. Taking impressions the old way is messy, can taste bad, takes more of a patient's time and can be unpleasant. The Trios 5 scanner can make this process more pleasant and avoid these issues.

- [H4] The Trios scanner is safe to use, takes accurate impressions, the process is faster and reduces patient discomfort. The device produces images for fabricating crowns, bridges, dentures, inlays/onlays and implant supported restorations and crowns. The images can be used for diagnostics as well as removable appliances and night guards.
